20-50-03: Butter homogeniser - reworker

Manufacturer: Machinefabriek O. Schouten B.V., Type: ECO01-001

Information

Butter homogeniser / reworker, special design to handle blocks of 500-1.000kg. With this system the earlier produced butter can be reworked and filled in big bag in box containers. Bigger blocks create less handling. Designed to handle the butter from cold storage at 0- 4 °C. The blocks are put in by a simple crane. The augers in the bottom of the unit scrape the butter blocks and push it towards an inline rotor and pump. Improving the quality ensuring the finest water dispersion resulting in an increased shelf life of the homogenized butter and makes it packable. Including new stainless steel rotor. Stainless steel auger feed station and stainless steel augers. The augers are 2 on 2 adjustable from 1 until 5 rpm through the control panel. Dimensions of feed station: 127 x 137 x 210 cm. 2 CIP spraybowls. Complete with lobe butterpump (Waukesha 064 U1, 2,2 kW - 78 rpm, 2015) 2500 kg/h and CIP pump. Including operating, spare parts manual in Dutch and including the electric scheme.

Description

Offer number	20-50-03
Description	Microfix
Manufacturer	Machinefabriek O. Schouten B.V.
Type	ECO01-001
Capacity	2.500 kg per hour
Year of manufacture	2002
Serial number	2002.10.001
Power	Includes 6 motors of 1,1 kW for infinitely variable drive (by potential meter) for the feed worms and a 15 kW for rotor drive (homogeniser)
Conditions	Good
Dimensions (L x W x H)	375 x 200 x 290 cm
Terms of delivery	FCA
Location	The Netherlands
