APV Gaulin 5-5, 8BX

This high-pressure homogenizer is equipped with a two-stage homogenization system with hydraulic pressure regulation.

The homogenization section is equipped with ball-type homogenization valves, suitable for viscous products. The pump is equipped with three pistons with a piston diameter of 18 mm and a stroke length of 38 mm.

The product connections are made with 1" Tri-Clamp couplings, suitable for hygienic processing environments in the dairy and food industries.

The motor power is 5.5 kW. In the current configuration with this motor, the maximum operating pressure is 400 bar (5,800 psi).

The unit is equipped with an oil circuit pump integrated into the control panel, including a manual bypass valve. In addition, the machine has a pressure gauge and a flow switch on the cooling water for process monitoring and safety.
