## Alfa Laval PX 65 Centrifuge for Fats and Oils Refining

QUOTE NR	26-07-03
MAKE/ TYPE	Alfa Laval PX 65
CAPACITY	15.000 L per hour
SERIAL NR	4214023 M
YEAR OF	
MANUFACTURING	2012
WEIGHT IN KG	+- 1750 kg
DIMENTIONS IN CM	170 x 130 x 175
CONDITION OF MACHINE	Good
LOCATION AND DELIVERY	The Netherlands, FCA
TERMS

### Alfa Laval PX 65 – High-Efficiency Centrifuge for Oil & Fat Refining

The Alfa Laval PX 65 is designed for continuous degumming, neutralizing, dewaxing and washing of fatty oils, including vegetable oils, lard, tallow and fish oil.

Its semi-hermetic, bottom-fed design ensures gentle acceleration of the feedstock to full bowl speed with minimal pressure drop and low feed-pressure requirements. Open outlets for the light and heavy phases are fitted with stationary paring devices: a fixed paring disc for the light phase and adjustable paring tubes for the heavy phase. Supplied complete with motor, OWM, foundation frame and tools.

The feed enters the bowl through a hollow spindle into the disc stack, where separation occurs. The light phase is pumped from the center, the heavy phase is discharged via an adjustable paring device, and sludge collects at the periphery. Sludge is automatically discharged at preset intervals by a hydraulic system and leaves the centrifuge via a cyclone.
